About me

- I'm a Software Developer with 3+ years of technical experience with agile software design, development and implementations using Java. I design software using Database System Principles specifically in the Relational Data Model.

Education

- 2+ Years experience with a Bachelors in Telecommunications Engineering at the Universidade Católica de Angola (UCAN).

Tecnology Sumary:

- **Programming Languages:** C, Java, PHP, JavaScript, SQL and Ruby.
- **Database Manager Systems:** PostgreSQL, MySQL Workbench, phpMyAdmin, SQLite and DBeaver.
- **Frameworks/Tools/Services:** HTML, CSS, Bootstrap, jQuery, Ajax, Servlet, JSP, JDBC, Spring Boot, Thymeleaf, Hibernate/JPA, Swing e iReport , Nodejs, express, Rspec, Rails, REST and RESTful API;
- **Operating Systems:** Windows, Linux Debian (Ubuntu and Mint);
- **Certifications:** Servlets with JavaServer Pages (JSP) and JDBC and Git Version Controle.
- **Others:** Git, GitHub, Bitbucket, GitHub Desktop, SmartGit, Heroku, Jira.

Professional Experience

- **As a freelancer I developed:**
  Portuguese / English Translator Dicionary;
  Ownership Payment Management Software;
  Medical Office Software;
  Seles Software.
- **As an employee and intern:**
  I did a six month internship at Synack Certified as a software designer and I developed the Medical Office Software.
  Currently I'm working at Globalsys as a web developer collaborator.

Personal Qualities

- Good adaptation and mastery in the use of any computer application.
- Dynamism and capacity and own initiative.

- Easy to adapt to any work environment.
