About me

- I'm a Software Developer with 3+ years of technical experience with agile software design, development and implementations using Java and about 2 years developing with Ruby on Rails using Background Jobs to process data. I design software using Database System Principles specifically in the Relational Data Model.

Education

- 3th Years Bachelors in Telecommunications Engineering at the Universidade Católica de Angola (UCAN).

Tecnology Sumary:

- **Programming Languages:** C, Ruby, Java, JavaScript and SQL.
- **Database Manager Systems:** PostgreSQL, MySQL Workbench, phpMyAdmin, SQLite and DBeaver;
- **Frameworks/Tools/Services:** Ruby on Rails, Rspec, Turbo, Hotwired, Redis, Sidekiq, HTML, CSS, Bootstrap, AWS S3 Storage, React JS, jQuery, REST and RESTful API;
- **Operating Systems:** Windows, Linux Debian (Ubuntu and Mint);
- **Certifications:** REST and RESTful API with Ruby on Rails;
- **Others:** Git, GitHub, Bitbucket, GitHub Desktop, SmartGit, Heroku, Jira.

Professional Experience

- **As a freelancer I developed:**
  Portuguese / English Translator Dicionary;
  Ownership Payment Management Software;
  Medical Office Software;
  Seles Software.
  [Software of jobs opportunities.](#)
- **As an employee and intern:**
  I did a six month internship at [Synack Certified](#) as a software designer and I developed the Medical Office Software.
  Currently I'm working at [Globalsys](#) as a web developer collaborator.

Personal Qualities

- Good adaptation and mastery in the use of any computer application.
- Dynamism and capacity and own initiative.

- Easy to adapt to any work environment.
